

# Speed Limiters & Cruise Control

Industry leading speed control solutions.

**Vodafone**  
Power to you

Vodafone Automotive's range of speed control products for light commercial vehicle platforms is focussed on improving the driving experience, reducing vehicle running costs and accident rates and helping fleet owners fulfil their duty of care obligations.

## Speed Limiter

A van can use 25% less fuel when it travels at 70mph rather than 80mph, thus reducing fuel costs, emissions and extending engine life.

Rising fuel costs are becoming an ever greater issue and our speed limiter gives operators another tool in their armoury to restrict a driver's speed, particularly when motorway driving, and with it subsequently reduce fuel use and costs.

## Cruise Control

Keeping a commercial vehicle or motorhome's speed under control, particularly on motorways can be difficult. Cruise control is not only a method of keeping your vehicle at the legal speeds, but also makes for a more relaxing driving experience.

OE Cruise Control features including "accelerate" and "coast", and the system disengages automatically when the brake or clutch is activated.

Speed Limiter unit

### Features

- Plug & Play installation
- CAN-bus integration
- Programmable ECU (speed limit)
- Euro 5 & Euro 4 Engine compatible, petrol & diesel
- OEM Approved

### Features

- Plug & Play Solutions
- CAN-bus integration
- Fully integrated system
- Euro 5 & Euro 4 Engine compatible, petrol & diesel
- OEM Approved

Cruise Control stalk

### Benefits

- Assists with Duty of Care responsibility
- Improves fuel economy, up to 25% less fuel usage
- Helps prevent unintentional speeding

### Benefits

- Relaxed and Comfortable driving
- Reduces Driver Fatigue
- Aids Fuel Economy
- Helps prevent unintentional speeding

### Product Specification/Technical Data

- Power supply: 10-15 Volt, Polarity protected
- Power consumption: 25-100 mA
- Temp range: -40 -+ 60 Degrees Celsius
- Type approval: E24 031854
- Pre programmed to 70mph
- Reprogrammable to any speed by Vodafone Automotive UK Ltd

### Product Specification/Technical Data

- Vehicle Specific Fitting Instructions
- Installation: 15 minutes to 1 hour
- CAN-bus vehicles are Plug & Play
- Non CAN-Bus vehicles are hardwire
- 26x Commercial Vehicle Applications
- Rostra Stalk Cruise Switch
- Integrated LED indicator
